

“ I haven’t had to touch a Shabbos clock in over three years!”

- a Time-It Right™ customer

 Are you tired of the mad dash to set Shabbos clocks every single week?

 Have you forgotten to unscrew the light bulb in the refrigerator one time too many?

 Do you wish you could stop your oven from heating up your house all Yom Tov long?

 Have you ever made a mistake with your Shabbos clock, and ended up sitting in the dark?

RELAX- 
with
Time-It Right™
your worries are over!

Perfect for:

- Homes
- Shuls
- Nursing Homes
- Any Shomer Shabbos institution

SHABBOS TIMING SYSTEMS

NEVER set another
Shabbos Clock

Home Automation for the
Shomer Shabbos family

Note: This product is protected
under U.S. Patent #6.473.661

The **Time-It Right™** Shabbos timing system is the ultimate in home automation for the Shomer Shabbos family. A revolutionary product, **Time-It Right™** is the only home automation system with a built in Jewish calendar. Based on “Smart House” technology, **Time-It Right™** is custom scheduled around *your* zemanim and *your* lifestyle- turning your lighting, cooling, heating, and other appliances on and off as *you* wish. But unlike other home automation systems, **Time-It Right™** automatically adjusts its schedule according to Shabbos and Yom Tov- making it the **ideal solution** for the Shomer Shabbos home, Shul, or institution.

An extensive interview is conducted with the homeowner by a qualified Time-It Right™ consultant, developing a customized schedule for Shabbos, Yom Tov, and everyday, for every device in the home. Time-It Right™ can control: lights, ovens, drapes, skylights, gates, locks, fireplaces, elevators, sprinkler systems, landscape lighting, and more. Once in operation, the schedule might include some of the following convenient features, and can include many, many more:

- Refrigerator and oven lights are automatically disconnected before Shabbos and Yom Tov.
- Lights go on and off automatically on Erev Shabbos and Yom Tov- no need to run around setting your lights.
- If required, alarm zones can be bypassed automatically before Shabbos; Cameras, monitors, and DVR's can also be turned off.

- Lights stay on later Seder nights, Shavuot, and Simchas Torah.
- Ovens go on and off numerous times throughout Yom Tov- on for meal preparation, and off again after they are no longer needed.
- Lights blink shortly before candle lighting times, or as a reminder to count Sefiras HaOmer, to say Krias Shema, to make an Eruv Tavshilin, or that Shabbos is over.

- The crock pot stays on later when Rosh Hashana falls out on Shabbos, and can be turned on Erev Shabbos when Yom Tov falls out on a Friday.
- Rooms which are not used all the time, such as guest suites, or rooms of children who are away at school or camp, can be enabled or disabled as needed.

TIME-IT RIGHT™ is HASSLE FREE

Time-It Right™ ...

- ⌚ Provides special schedules for early Mincha mode and Simcha/guest mode. Its vacation mode gives your house a lived-in look while you are away.
- ⌚ Is the only system that can control today's modern computerized ovens, turning them on and off at meal times over a two or three day Yom Tov.
- ⌚ Can control your existing lighting system, including Lutron Homeworks™, Crestron™, and many others.
- ⌚ Is easily installed in both new **and** existing homes.
- ⌚ Has precision programming - devices are turned on or off at the exact desired time.
- ⌚ Generates its schedule automatically, with no need for manual input or maintaining multiple schedules.
- ⌚ Is easily adjusted. Homeowners can make changes to the schedule at any time.
- ⌚ Restores the schedule to the proper state after a power outage, using its power-fail recovery feature.
- ⌚ Never needs resetting. Unless you want an adjustment, once its set, it's set for life- so you can literally **set it and FORGET it!**
